iFund Trading Tip:

An important key is to look for sudden *change*. When a single Elephant Bar stands out as being a rare breed compared to all or most of the bars to the left of it, that its when it means the most.

Two Types of Elephant Bars

There are two types of Elephant Bars:

Igniting and Exhaustion

Igniting Elephant Bars change the direction of the current trend. In other words, they *ignite* a brand new move.

Exhaustion Elephant Bars continue or exasperate an already well established trend. Said another way, rather than change, they actually continue the current color.
